Inspiration

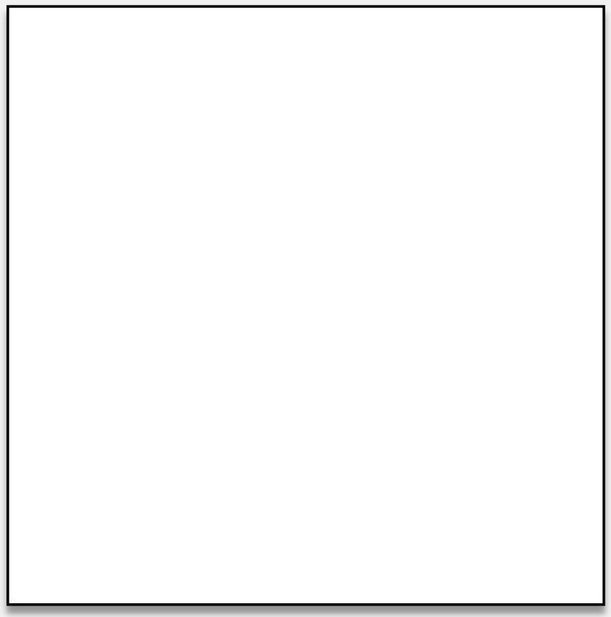

White has transcended its visual definition to become a spiritual carrier woven through civilizations — from the temples of Athens to the ideal city of Brasília, it has always been inscribed with humanity's pursuit of eternity. The narrative of white in 2026 no longer lingers on superficial purity, but reconstructs classical rhythms with minimalist geometry, letting light flow through exquisite material textures to form a new sacred language. This silent dialogue connects time and space in pure forms, enabling order, faith and future possibilities to reach ultimate harmony in a single hue.

Inspiration

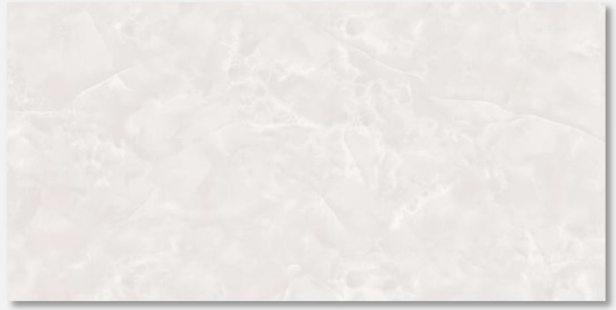

Jade has always held a hallowed and unique place in the long river of human civilization. From ancient ceremonial objects to today's treasured adornments, it has been cherished for its gentle texture, radiant colors, and mysteriously rich symbolism. The inspiration for our latest product collection comes from the myriad enchanting forms of natural jade. Its naturally occurring patterns seem to bear the unique imprint of time, while its soft luster appears to contain an endless depth of warmth and grace.

Glazed Marble Series

Rock stratum

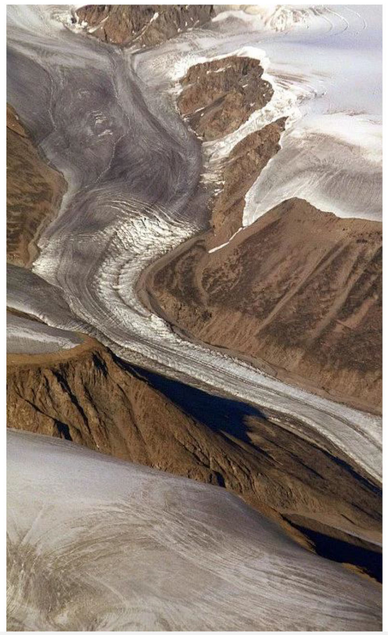

SIZE:600x600mm

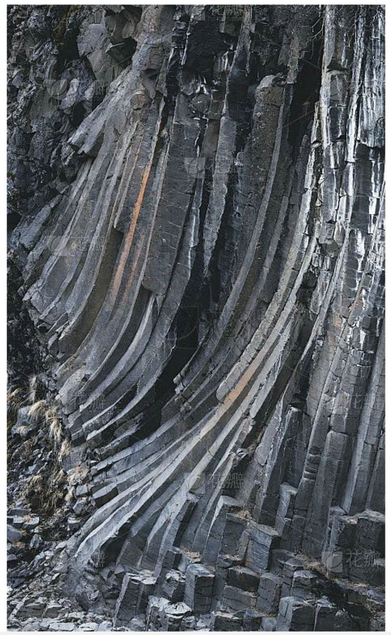

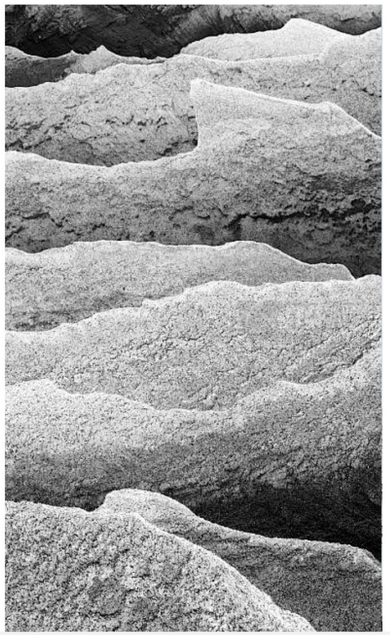

- P66032----------

SIZE:600x1200mm

- P61013----------

Inspiration

Everything originates from reverence for primal landscapes. When the dawn light touches the veins of Carrara marble in Italy, meeting the snowlines of the Alps, a philosophy of "white space" that transcends color itself is quietly born. We do not merely replicate stone—we capture the traces of rock's dialogue with light and time over hundreds of millions of years of sedimentation: the fissures carved by glacial movement, the delicate textures shaped by ocean tides, the occasional glint of mineral crystals. This collection uses modern glazing techniques to distill this vast yet serendipitous epic of nature into an enduring canvas of precision-laid surfaces.

- P66025----------
- P66026----------

Inspiration

Florence, the cradle of the Renaissance, finds its soul not only in resplendent frescoes and majestic domes, but also within the serene stone that forms its very architectural fabric—the white marble of the Cathedral of Santa Maria del Fiore, the sandstone of Ponte Vecchio worn smooth by river currents, and the warm, muted tones of grey and beige that time has gently laid upon the façades of its ancient palazzos over centuries.

Scottish Crystal Rock

Between minimalism and warmth, we have found the gentlest balance.

Natural stone and fine gravel in the morning light. Every pattern is a work of nature.
